

Business Sales Performance Analytics Dashboard

Project Overview

This project is a **Business Sales Performance Analytics Dashboard** built using Power BI. It analyses retail sales data to uncover insights about revenue, profit, product performance, regional trends, and customer behaviour.

The goal of this project is to demonstrate how data analytics can support **real business decision-making**.

Objective

- Analyze sales performance across different categories and regions
 - Identify top-performing products and customers
 - Understand profit trends and revenue distribution
 - Provide actionable business insights
-

Dataset

Source: Kaggle Superstore Dataset

The dataset includes:

- Order Date
 - Sales
 - Profit
 - Quantity
 - Product Category & Sub-category
 - Region
 - Customer Information
 - Product Details
-

Tools Used

- Power BI (Dashboard & Visualization)
 - Microsoft Excel (Data Cleaning)
-

Key Performance Indicators (KPIs)

- Total Sales
 - Total Profit
 - Total Quantity
 - Profit Margin
 - Top Category
 - Top Region
-

Dashboard Features

- ✓ Sales Trend Analysis (Time Series)
 - ✓ Category-wise Performance
 - ✓ Region-wise Sales & Profit
 - ✓ Top Products Analysis
 - ✓ Customer Insights
 - ✓ Interactive Filters (Slicers)
-

Key Insights

- Technology category generates the highest revenue
 - West region is the top-performing region in sales and profit
 - Sales show seasonal variation with peak months
 - A small number of products contribute to majority of revenue
 - Profitability varies significantly across categories
-

Business Recommendations

- Focus on high-profit categories like Technology
 - Improve pricing strategy for low-margin products
 - Increase stock during peak demand months
 - Expand operations in high-performing regions
 - Improve customer retention for top buyers
-

How to Use

1. Download or clone the repository
2. Open the .pbix file in Power BI Desktop
3. Explore interactive dashboards
4. View insights and analysis

Future Improvements

- Add predictive sales forecasting
- Implement advanced DAX calculations
- Customer lifetime value analysis
- Real-time dashboard integration
